SUMMARY

Product designer and design engineer with 10 years of shipped products, ranked in the top 3% of designers worldwide on Toptal. I design end to end and build what I design: dashboards, design systems, and production front-ends in React — with deep experience designing AI products, from an AI cost-optimization platform to an AI research thesis. Currently researching human-computer interaction in Wendy Mackay's ex)situ group (Inria / LISN) while completing an MSc in HCI at Université Paris-Saclay. Open to senior product design roles and HCI research internships.

EXPERIENCE

HCI Researcher — Inria / LISN, ex)situ group, Paris 2026 – Present

- Research how scientists collaborate across tools, in Wendy Mackay's research group at Université Paris-Saclay.
- Apply structured HCI methods — generative walkthroughs, video prototyping, participatory design — to the design of collaborative systems.
- Current project: rethinking cross-tool collaboration for La Suite numérique, the French government's digital workspace suite.

Product Designer & Front-End Engineer — Backgammon Galaxy 2024 – 2025

- Redesigned the mobile app of the world's largest online backgammon community, raising its App Store rating from 2 to 4.3 stars.
- Built the product's design system (334 components) and implemented the front-end in production code; the platform reached 15,000 peak concurrent players after rollout.
- Worked directly with the CEO and art director, with daily design handoffs and reviews alongside the engineers and product manager.

Senior Product Designer (Top 3%) — Toptal 2022 – Present

- Thinking Machine (AI-powered cost-optimization platform for telecoms): sole designer; designed the full platform — onboarding, dashboards, savings review, cost-centre configuration, analytics — serving clients in 26 countries and 18 languages.
- Led the platform's second major phase, reorganizing its navigation around user tasks; the no-code application builder cut development time by 30–40%.
- Oar Health (telehealth): redesigned the member dashboard, lifting customer conversion by 23%; designed the Care+ member experience and the end-to-end intake flow; supervised the team's junior UX researcher.

Designer & Front-End Developer — Nickelfox Technologies 2019 – 2021

- Designed and built apps and websites on a team ranked among Dribbble's top 100 design teams worldwide; one shot passed 57,000 views.

Founder, Designer & Front-End Developer — CreativeDannies (own studio) 2016 – 2021

- Designed and built websites and apps for international clients including CheapBills Pty Ltd, MoveInConnect, DomiDocs, TullabApp, and One Item.

RESEARCH EXPERIENCE

Research Fellow, Software Engineer — BioComputing UP Laboratory, University of Padua Sep 2024 – Jul 2025

- One-year fully funded fellowship improving the APICURON, DisProt, and DOME Registry biological databases, used daily by working biologists — designing the interfaces and building them myself in Angular.

EDUCATION

MSc, Human-Computer Interaction — Université Paris-Saclay

2025 – Present

BSc, Information Engineering — University of Padua (full scholarship)

Graduated Jul 2024

- Thesis: an AI chatbot for retrieving information from biological databases (named-entity recognition, relation extraction, semantic search).

SKILLS

Design: Product Design, UX Design, UI Design, Design Systems, Interaction Design, Motion Design, UX Research, Usability Testing, Prototyping, Figma, Figma Make, Jitter

Engineering: React, TypeScript, JavaScript, HTML, CSS, Vite, Node.js, Angular, Python, Django, Git, Docker, AI-assisted development

Research & Data: HCI research methods (interviews, generative walkthroughs, video prototyping), Machine Learning, scikit-learn, pandas, Jupyter

Languages: English (fluent), French (B1)

HONORS & AWARDS

- Top 3% of designers worldwide, Toptal — 2022
- Fully funded research fellowship, University of Padua — 2024
- Fully funded scholarship for bachelor's studies, University of Padua — 2021–2024
- Member of a Dribbble top-100 design team worldwide (Nickelfox) — 2019–2021

PUBLICATIONS & TEACHING

- Peer-reviewed publication: Nasiri Babil, D. and Rasekh, N., "Improvement Accuracy for C4.5 Decision Tree Algorithm," IJNAA.
- Teaching: UX research bootcamp, University of Padua (2022) — research methods and professional review sessions for SaaS and B2B products.
- Kaggle: ranked 131st of 1,172, mini-course sales forecasting (2024).
